

Final Presentations: I will gather the following data points:

1- Frequency of Soft Skill Mentions

- I will count how many times students explicitly reference soft skills (e.g., teamwork, adaptability) in their project presentation.
- This shows awareness and integration.

2- Type of Soft Skills Applied

- I will list which ones they mention to check more thoroughly if they really used the Soft Skills passport or just mention general soft skills just for the presentation.

3- Level of Integration

0 = Not mentioned

1 = Mentioned but not applied

2 = Applied superficially

3 = Applied thoroughly with examples

4- Evidence of Reflection

- Did they explain *why* they used a soft skill or how it impacted the project?
- Scaled: None, Minimal, Strong

Student	Frequency of Soft Skill Mentions and Which ones	Level of Integration				Evidence of Reflection		
		0	1	2	3	None	Minimal	Strong
